4. In the Universities of Oxford, Cambridge, and Dublin: A graduate (most often the fellow of a college), to whom the special supervision of an undergraduate (called his pupil) is assigned.

The word was first used of those who stood in this relation to undergraduate members of colleges or halls, not on the foundation, and were responsible to the hall or college for their pupils' payments (= *creancers*: cf. Creancer 2). By Wykeham's Statutes for New Coll., Oxf., imitated at King's Coll., Camb., and Magdalen Coll., Oxf., each junior foundationer was assigned to the special charge of a senior called his *informator*. Both these offices appear to have been merged later in the tutor. Naturally the tutor looked after his pupils' studies also, and this came to be the main part of his duties, esp. at Oxford. *Moderns* are also found at Louvain in 1476 supervising the studies of the *scholares* (Rashdall *Universities of Eur.* (1895) II. 766).

*c* 1610 in *Brasenose Coll. Quatercent. Monogr.* (1909) II. ii. 41 14 Mendesmen..bring young Gentlemen into new and chargeable fashions contrary to the desires of their parents and the directions of their Tutors. *a* 1648 J.D. Herbert *Autobiog.* (1824) 42 As if they meant to proceed Masters of Art and Doctors in some Science, for which purpose their tutors commonly spend much time in teaching them the subtilities of Logic. 1653 *Register of Visitors Univ. Oxford* (1881) 359 That noe man be admitted to the office of a Tutor in any College or Hall that is not first approved of by the respective Head of such College or Hall and the Visitors of the University. *Ibid.* 360 That all persons of whatsoever quality so-ever, untill they be admitted to the Degree of Bachelor of Arts..doe liue under the care, tuition, and instruction of approved Tutors. 1696 Phillips (ed. 3) s. v., A Tutour in the University, is one that takes care to teach and instruct the Youth that are sent thither from inferior Schools; and the Scholar so taught, is call'd the Tutour's Pupil. 1864 J. H. Newman *Apol.* (1 ed.) 7/2, I gave up that office in 1826, when I became Tutor of my College. 1884 C. Dickens *Dict. Cambridge* 15 The Tutor ..generally acts as agent for the College in all business transactions with its members. .. The Tutor himself does not necessarily lecture or teach. Private Tutors are called Coaches. 1884 J. B. Mullinger *Univ. Camb. from 1535*, 396 The Cambridge system by which the expenditure of the student is supervised to a certain extent by the tutor was in operation as early as the sixteenth century. 1886 Willis & Clark *Cambridge* I. Introd. p. lii In the [Latin] statutes of Clare Hall [1551]..we meet for the first time at Cambridge with the term *tutor*, in the modern sense, namely, a fellow of the college who is to be responsible for his pupil's expenses, to explain to him what he has to do and to learn, and..is to be treated by him with filial obedience and respect. 1887 *Q. Rev.* Oct. 403 By the middle of the sixteenth century, the modern system of admitting students not on the foundation was fully established; and as a natural result, the office of 'tutor' in the present meaning of the term then first appears. 1895 Rashdall *Universities of Eur.* II. 515 It seems probable that before the middle of the fifteenth century the teaching of Undergraduates, was mainly in the hands of Tutors in the Colleges, or Principals and their assistant Regents or non-graduate Lectors in the Halls. *Note*, The word used both at New College [c 1400] and Magdalen [1479] is *Informator*. At Brasenose College [founded 1509] the word *Tutor* occurs for the first time, but only in reference to the Fellow who is to be responsible for a Commoner.

b. In U.S. universities and colleges: 'A teacher subordinate to a professor, usually appointed for a year or a term of years' (*Cent. Dict.*).

1828 Webster s. v., Tutors are graduates selected by the governors or trustees, for the instruction of undergraduates. .. They are usually officers of the institution, who have a share, with the president and professors, in the government of the students.

c. *Private tutor* (at the English Universities): A person engaged by students to assist them in their studies and preparation for the examinations, but not appointed or recognized by the University or College. Also, a person who makes it his business to prepare students for professional examinations apart from the universities, as *an army tutor*, *a law tutor*.

1827 Lytton *Falklands* 1. 15 I was sent to a private tutor. 1840 *Encycl. Brit.* (ed. 7) XXI. 498/1 Although recognised neither by the universities, nor by any particular college, a very numerous class has long existed both at Oxford and Cambridge, who, under the denomination of *Private Tutors*, superintend and assist the studies of individuals. 1884 C. Dickens (see 4).

5. In some English public schools: a. A senior boy appointed to help a junior in his studies. Now only at Winchester.

1689 A. Hill *Life Barrow* B.'s Wks. 1687 I. a 2, Removing [from the Charterhouse] to Felsted..he quickly made so great a progress in Learning..that his Master appointed him a little Tutour to the Lord Viscount Fairfax. 1898 Sargeant *Ann. Westminster* vii. 123 The very name of 'little tutor' familiar in the schools of the seventeenth century is now wholly forgotten. .. The 'little tutor' was paid for his services and might thus gather a small purse against the time when he should go to the University. 1901 *Winchester Coll. Notions* 132 The ten Senior Praefects in College are called Tutors.

b. A master charged with the special supervision of a particular boy.

1861 J. T. Coleridge *Publ. Sch. Educ.* 37 [At Eton] Every Master therefore but the Head Master is also a Tutor and every boy must have his Tutor. .. Every exercise the pupil does is first submitted to the Tutor for inspection and correction and then carried into school. 1901 *Winchester Coll. Notions* 130 College Tutor formerly had to correct the composition of College men, but now he helps College Juniors with their work.

**Twain** (twēin), *numeral a.* and *sb. arch.* Forms: 1 twæȝen, tuæȝen, 1–2 twæȝen, twæȝen, 2 tweiȝen, 2–3 tweien, 3 tweyen; 2–5 twein, 3–5 tweyne, tweine, twene, (4 tweiyne, tueine), 4–5 tweyn, 5 tweyne; 4 tuayn, tuain, 4–6 twayne (5 tueyne, thwayne), 5–6 twayn, 6 *Sc.* twane, 6–7 twaine, (7 *Sc.* tuaine), 6– twain. [The modern representative of OE. *twēgen*, the nom. and acc. masc. of the numeral of which the fem. and neuter *twā*, *tū*, remain as Two (q. v.). It corresponds to OFris. *twēne*, *twēn* (mod.Fris. dial. *tween*, *twein*, *twain*), OS. *twēna*, *twēne*, OHG. and MHG. *zwēne* (archaic Ger. *zween*). In ME. *twain* ceased to be confined to the masc., and became merely a secondary form of *two*, used esp. when the numeral followed the sb. Its use in the Bible of 1611 and in the Marriage Service, and its value as a rime-word, have contributed to its retention as an archaic and poetic synonym of *two*. See also the apocopate form Twax; and, for the inflexions, Two.]

**Tweed** (twēd). [A trade name originating in an accidental misreading of *tweel*, Sc. form of TWILL (or a misunderstanding of an abbreviated *tweeled* TWILLED *a.*[1]), helped by association with the River Tweed.

The form appears to have originated in or about 1831, but published statements are not quite in accord as to the circumstances which gave rise to it. The more important of these accounts are to be found in Jas. Locke's *Tweed & Don* (1860) 37, in a paper by D. Watson in *Trans. Hawick Archæol. Soc.* (1868) 14, and in A. Barlow's *Weaving* (1878) 49. Barlow and others attribute the misreading of the word to Jas. Locke himself (who was a London merchant), but Locke in his own book does not claim to have been the originator of the name, which had become fully current by 1850.]

The forms in the cognate languages which more or less closely correspond to OE. *twá* and *tú* are OFris. *twá* fem. and neut. (WFris. *twa,* EFris. *twô,* NFris. *tâw, tau, tô, tâ*), MDu. and Du. *twee,* OS. *twâ, twô* fem., *twê* neut. (MLG. *twô, twei* fem., *twê* neut.; LG. *twê, twe*), OHG. *zwâ, zwô* fem., *zwei* neut. (Norw. dial. *twei, twæ, two, tvau,* etc.; Sw. *två,* Da. *to*), Goth. *twai* masc., *twôs* fem., *twa* neut. (For the forms corresponding to the OE. masc. *twégen* see TWAIN.) The word is common to all the Indo-European languages, as Skr. *dvau* masc., *dvê* fem. and neut., Gr. δύο, L. *duo,* Olr. *dá,* Lith. *du, dvi,* etc.

The genitive and dative forms (see A. 2 and A. 3) did not survive beyond the 13th century.

The pronunc. (tū), like that of *who* (hū) from OE. *hwá,* is due to labialization of the vowel by the *w* (cf. *womb*), which then disappeared before the related sound. The successive stages would thus be (twá, twō, two, twū, tū).]

**Ty**, obs. form of TIE.

**-ty,** *suffix*[1], denoting quality or condition, representing ME. *-ite, -te, -te* (early ME. *-teb*), from OF. *-te* (mod. F. *-té*), earlier *-tet* (*-ted*) :—L. *-titem*, nom. *-tās*. Such Latin types as *bonitātem, fertitātem*, were in OF. normally reduced to two syllables (*bonitet, fertet*) by elision of the *-i-* between the two stresses, so that *-tet*, later *-te*, became the regular form of the suffix. The final dental still appears in some early adoptions in ME., as *plenteb*, *plenteth* plenty (*c* 1250, in use till *c* 1600), and is characteristic of the Scottish forms *bountith*, *daintith*, and *poortith* (q. v.). The reduced form *-te*, however, is found in words recorded from shortly before or after 1200, such as *bonte* bounty, *cruelte* cruelty, *deboneite* debonairness, *deinte* dainty (sb.), *plente* plenty, *poverte* poverty, *purete* purity, and *vilte* vileness. Among others which appear somewhat later are *certeynte* certainty, *Cristente* Christenty, *frealte* frailty, *novelte* novelty, and *sotelte* subtlety. Varying forms of the stem are found in the words now or formerly represented by *beauty*, *fealty*, *leally*, †*lewty*, *loyalty*, †*realty*, †*rialty*, and *royalty*. From the types *leale*, *reale*, the ending *-alte* (mod. F. *-auté*) was in OF. extended to formations from different stems, and many words of this form (ultimately written with *-alty*) established themselves in English, as *admiralty*, *casualty*, *commonalty*, †*generalty*, *mayoralty*, †*principalty*, †*regalty*, *severalty*, *specialty*, *spiritualty*, *temporalty*. Most of these date from the 14th or early 15th century; *penalty* appears to be of later introduction (1512). An obsolete type of formation is exhibited by *curiouste*, *hid(e)ouste*, and *joyouste*. In OF. certain analogies led to the frequent substitution of *-ete* for *-te*, but this form of the suffix is only occasionally adopted in English, as in the obsolete *noblete*, *purete*, and *simplete*; the early *sauvete* is now represented by *safety*. Under Latin influence many words in OF. also appear with *-ite* (mod. F. *-ité*) in place of *-(e)te*; hence English forms in *-ITY*, which in many cases (as in F.) have supplanted those in *-ty*.

Although occurring in a large number of words the suffix has shown little productive power in English; *evelte*, *everlastingte*, and *overte* occur in the 14–15th cent., and *shrievalty*, *sheriffalty*, have had currency from the beginning of the 16th cent., but such formations are very rare.

Such words as *faculty*, *difficulty*, *honesty*, *modesty*, *puberty*, represent Latin formations in which the suffix *-tās* is directly added to a consonantal stem. The number of these in English, as in French, is very small.

The early form of the suffix (*-te*, or *-ete*) remained in use down to the 16th cent., but from the 15th was gradually supplanted by *-ite*, *-tye*, and the surviving *-ty*.

**-ty,** *suffix*[2], denoting 'ten', forming the second element of the decade numerals from 20 to 90 (in OE. to 120), as *twenty*, *thirty* (OE. *twentig*, *þrittig*), etc. The OE. *-tig* (gen. sing. *-tiges*, gen. pl. *-tiga*, *-tigra*, dat. pl. *-tigum*) corresponds to OFris. *-tich*, *-tech* (pl. *-tiga*, *-tega*), MDu. *-tigh* (Du. *-tig*), OS. *-tig* (*-thig*), *-teg*, *-tich*, *-tech* (MLG. and LG. *-tig*), OHG. *-sug*, *-zuc*, *-zoch* (MHG. *-zec*, *-zic*, G. *-zig*), and is the same as ON. *tigr*, *tegr*, *tugr* (pl. *tigir*, etc.) and Goth. *tigus* (pl. *tigjus*), which are not suffixed but remain independent words, as ON. *tveir tigir*, Goth. *twai tigjus*, twenty. For examples of the OE. forms and syntactical usage, see the various numerals.

[Two different Oriental words are included here: (1) the *a*-forms (like Pg. *tufão*, †*tufõe*) are a. Urdū (Persian and Arabic) طوفان *tūfān* a violent storm of wind and rain, a tempest, hurricane, tornado, commonly referred to Arab. طاف *tāfa*, to turn round (nouns of action طوف *ṭawf*, طوفان *ṭawfān*), but possibly an adoption of Gr. τυφῶν Typhon[2]; (2) the *β*- and *γ*- forms represent Chinese *tai fung*, common dialect forms (as in Cantonese) of *ta* big, and *fēng* wind (hence also G. *teifun*). The spelling of the *β*-forms has apparently been influenced by that of the earlier-known Indian word, while that now current is due to association with Typhon.[2]]

**a.** A violent storm or tempest occurring in India († occas. with reference to other localities); **b.** A violent cyclonic storm or hurricane occurring in the China seas and adjacent regions, chiefly during the period from July to October.

# U.

U (yū), the 21st letter of the modern English, and the 20th of the ancient Roman alphabet, was in the latter identical in form and origin with V (q.v.), the same symbol being employed both as a vowel and a consonant. In Latin MSS. written in capitals the form V is retained; but in uncial MSS., of which the earliest specimens belong to the third or fourth century, the modified form ᏼ appears, and is continued in the later half-uncial (from *c* 500) and minuscule MSS. (from the eighth century) as u. In Anglo-Saxon MSS. the latter form (u) was regularly employed as a minuscule to denote the vowel *u*, the corresponding form in capitals being either V or U. In early MSS. *u* and *uu* are also employed with the value of *w*, and very rarely *u* in place of *b* (later *f*) to denote intervocalic *v*; in late MSS. the substitution of *u* for *f* (=v) becomes fairly common, usually between vowels but sometimes also initially. In ME., after continental usage, the two symbols *u* and *v* were employed, but without clear distinction in value, each of them being used to denote either the vowel *u* or the consonant *v*. The practice with regard to the employment of the two forms varied considerably, but the general tendency was to write *v* initially and *u* in other positions, regardless of phonetic considerations, e.g. *vnder, vpon, vse* but *cure, full, huge*, and *vain, vice, vile* but *saue, euer, giuen*. For the sake of clearness, however, *v* was frequently preferred to *u*, especially in conjunction with *n* and *m*, as in *vne, rovnd, move*. (In Scottish MSS. intervocalic *u* with the value of *v* is much rarer than in English, its place being largely taken by *f, ff, v* or *w*.) The early printers followed the common usage with regard to *u* and *v* in small letters; in capitals they employed only one symbol, viz. ᏼ in black letter, and V in Roman. During the sixteenth century, however, continental printers began to distinguish between *u* and *v*, using the former as a vowel and the latter as a consonant. The distinction is found in Italian printing as early as 1524, but its general introduction dates from 1559–60, when it was employed in the *Grammatica* of Ramus; apparently the innovation was due to the printer rather than to the author. In English there were several attempts to introduce the distinction before 1600; after 1600 it rapidly became more common, and had come to be general by 1630. In capitals, however, V for some time continued to serve in the old double function, although ᏼ had been introduced in the work of Ramus. This was subsequently adopted and retained the usual form for the capital vowel until the close of the 17th century, after which it rapidly gave way to U, a form which is employed, though at first sparingly, from at least 1625. (In italic type the vowel was *V*, the consonant *V*.) From about 1700 the regular forms have been U u for the vowel, and V v for the consonant.

One result of the long-continued confusion of *u* and *v* was that in dictionaries, indexes, etc., words beginning with the vowel and with the consonant were combined in one list, *va-* being followed by *vb-* (i.e. *ub-*), *ve-* by *vf-*, etc. This practice was very commonly continued even after the two letters had been distinguished, and in English dictionaries remained as late as Todd's edition of Johnson (1818) and Richardson's dictionary (1837). When the two letters were separated, *v-* was sometimes placed before *u-*; a late example of this occurs in Jodrell's dictionary (1820). The modern arrangement, by which *u-* precedes *v-*, is found from at least the early part of the 18th cent., and has been usual in English dictionaries from that of Webster (1828) onwards.

In OE. the vowel-sounds denoted by *u* were those of Latin *u*, short and long, in the former case corresponding to that of mod.E. *pull, bush*, in the latter to that of *rude, brute*. In ME. the short *u* in native words partly retained its own sound, and was partly altered by lengthening or other phonetic changes; in some words the sound remained while the spelling was altered, as in *wolf* (OE. *wulf*), *woll* (OE. *wull*). The long *u* also retained its sound (unless when shortened before certain consonants), but was denoted by the new symbol *ou* derived from French spelling. Short and long *u* also freely occurred in words of French and Latin origin, but differed in quality from those of the native words, having the value of *ū, ū*; in the case of *ū* the difference continued to be marked, and the resultant sounds are now quite distinct. Under the influence of these forms southern ME. scribes substituted *u* for OE. *y, ȳ* (which had expressed the sounds *ü, ǖ*), writing *cun, cuðen*, etc., for OE. *cyn, cȳðan*, which in midland and northern dialects became *kin, kithe*.

In mod.E. the short *u* of OE. (apart from changes due to lengthening, etc.) has normally become *ʊ* (written *u* or *o*), as *dumb, sun, thus* = OE. *dumb, sunne, þus*, or *some, love* = OE. *sum, luf-u*. This change apparently had not proceeded far enough to be clearly noticeable until the middle of the 17th century, and was probably not generally completed until the beginning of the 18th. Over all the north of England, however, and a large part of the midlands, the original sound of *u* remains in words of this class, and even in standard English it is preserved in a few instances after labial consonants, as in *bull, full, pull, bush, put*. Short *u* also has this sound in some common words not of native origin (mostly with labial initials), as *bushel, butcher, pudding, pulpit, push, sugar*. The OE. *ū* (ME. *ou*) has normally become the diphthong (ɑʊ), written *ou* or *ow*, as in *thou, town* = OE. *þū, tūn*, but in a few instances has been shortened, as in *plum, thumb*. The ME. *ū* from French or Latin, on the other hand, has become the diphthong (iʊ̄, iʊ̄ᵉ), written *u, ue*, or *u-e*, as in *huge, mute, future, cure*, with reduction to (ʊ̄, ʊ̄ᵉ) after *s* (=*ʃ, ʒ*), *j*, and *r*, as in *sure, jury, brute, rule*, optionally after *l*, as in *lute, lure*, and more widely in American usage. This mode of spelling has also been extended to some native words which originally had a diphthong, and would normally be written with *ew*, as *hue, rue, true, truth* (compared with *new, grew, strew*). The same sounds (iʊ̄, ʊ̄) are also represented by *ui* in a few words, as *nuisance, bruise, fruit*.

In combination with other vowels *u* is employed in the groups *au* (ɑ̄), *eu* (iʊ̄), *ou* (with varying value, as in *foul, soul, four, young, route*), *ue* and *ui* (see above). It is silent after *g* in many words, as *guard, guide, plague*, and in final *-que*, as *masque, grotesque*. It has the value of *w* after *q* in other positions, and in various words after *g* and *s*, as *queen, quick, inquest*; *guano, iguana, anguish*; *suave, persuade*, etc.

The name of the letter down to the 16th century was *u*, pronounced like the long *u* of French or Latin origin, and consequently undergoing the same change to (iʊ̄) which took place in ordinary words. The completion of the change is indicated by the use of the letter (*u* or *v*) to represent the personal pronoun *you* in such passages as Shaks. *L. L. L.* v. i. 60 and Dekker and Webster *Westward Hoe* II. i. (Cf. I O U.) In Scotland the name (*ū*) was locally in use as late as the 19th century.

**Ulama, Ulan,** variants of ULEMA, UHLAN.

**-ular,** *suffix*, representing L. *-ulāris* (whence also F. *-ulaire*, Sp. and Pg. *-ular*, It. *-ulare*, *-olare*), formed by the addition of *-āris* -AR[1] to the diminutive suffix *-ul-*, and employed in adjs. derived from nouns ending in *-ulus*, *-ula*, *-ulum*, as *popŭlāris*, *rēgŭlāris*, *sēculāris*, f. *populus*, *rēgula*, *sēculum*. A considerable number of these are re corded from classical or post-classical Latin, as *angŭlāris*, *annŭlāris*, *caniculāris*, *circulāris*, *fistulāris*, etc., and many of these have at various dates been adopted in English in the forms *angular*, *annular*.

etc. Many others are derived either from mediæval or modern Latin formations, or have been directly formed on Latin sbs., as *auricular, capsular, cellular, corpuscular, funicular, globular, jugular*, etc., the use of the suffix having steadily become more frequent (especially in scientific use) since the 17th century. When the primitive noun as well as the diminutive exists in English, and is in common use, the adj. in *-ular* is usually associated with it; thus *glandular* and *globular* commonly correspond to *gland, globe*, rather than to *glandule, globule*. This, however, has not given rise to much independent use of the suffix, which is normally confined to the above types.

**Ulcer** (ʌ'lsəɹ), *sb.* Also 5–7 vlcer, 5–6 vlcere, 6 ulcere. [ad. L. *ulcer-, ulcus* neut. (related to Gr. ἕλκος), whence also It. *ulcera* fem., *ulcero* masc., Sp. and Pg. *ulcera* fem., F. *ulcère* masc. († and fem.), OF. *ulcere* (1314).]

**-ule,** *suffix*, representing the Latin diminutive ending *-ulus, -ula, -ulum* (whence also F. *-ule*, Sp. and Pg. *-ulo, -ula*, It. *-ulo, -ula, -olo, -ola*), as in *globulus* globule, *glandula* glandule, *granulum* granule. Among words now current with this ending a certain number correspond to actual Latin forms, as *capsule, cellule, ferule, macule, nodule, pustule, spherule, valvule*; others are of modern formation, as *anguilluie*. Only a few of these were in use before the 17th century. Some examples, as *angule, circule, scrupule*, failed to establish themselves against the earlier forms of French origin in *-le*; others, as *formule*, have given way to the purely Latin form. In some cases both forms exist in scientific use, as *ligule* and *ligula, macule* and *macula, valvule* and *valvula*; in some the Latin form is commonly or exclusively employed, as *lingula, tabula*.

‖ **Ulema** (ʊ̃lēmă̄, ū-lĕmă̄, ū-, yūlĕ·mă). Also ? ulemi, 9 oulema, uhlema, oolama, ulama. [a. Arab. (also Turk. and Pers.) علما *ʿulamā*, pl. of عالم *ʿālim* knowing, learned, f. *ʿalama* to know. Hence also Sp. *Ulema*, Pg. *Ulemas*, F. *Uléma*.]

**Ulmic** (ｖ·lmik), *a. Chem.* [f. L. *ulm-us* elm, after Ulmin. Cf. F. *ulmique*, Pg. *ulmico.*] *Ulmic acid*: a. = Ulmin I.

A distinction between ulmic acid and ulmin or ulmine has been made by various chemists, but without agreement in the precise application of the terms.

1831 T. Thomson *Chem. Inorg. Bodies* II. 105 Ulmic acid appears to be a vegetable substance of very great importance..obtained from the exudation of the elm by dissolving the exudation in water and precipitating the ulmic acid. 1836 Brande *Man. Chem.* 923 As it [*sc.* ulmin] combines with bases, Boullay terms it *ulmic acid*...He represents ulmin, or ulmic acid, as a compound [etc.]. 1868 Watts *Dict. Chem.* V. 936 The name 'ulmic acid', or 'ulmin', was given by Klaproth to a gummy substance contained in the black alkaline excrescences on the stems of unhealthy trees, especially of elms.

**b.** = Ulmin I.

2. 1843 *Penny Cycl.* XXV. 491/1 Ulmic acid plays an important part in manures and soils, and what is called mosswater owes its peculiar properties to its presence. 1868 Watts *Dict. Chem.* V. 936 The ammoniacal solution..deposits brown or black gelatinous flocks of ulmic acid.

**Ulmin** (ｖ·lmin). *Chem.* Also **ulmine.** [f. L. *ulm-us* elm + -IN: named by Thomson. Cf. F. *ulmine*, Pg. *ulmina.*]

**1.** A substance which exudes spontaneously from the inner bark of the elm and some other trees; *spec.* the final stage of this as a distinct chemical principle.

*a.* 1813 T. Thomson *Syst. Chem.* (1817) IV. 48 Ulmin..was first noticed in 1804, by Klaproth, who found it in a spontaneous exudation from the elm. 1819 Brande *Chem.* 366 Ulmin is a dark brown colour, with scarcely any taste or smell...The exudation from the elm is generally combined with carbonate of potassa, and is therefore readily soluble in water. 1842 *Penny Cycl.* XXII. 26/1 Simaruba is the bark of the root of the Simaruba amara...Its chief constituents are..ulmin, mucilage, and some salts.

**2.** A dark-brown or black product resulting from the decay of wood or vegetable matter, or artificially obtained by the action of powerful chemical agents on sugar and some other substances.

*a.* 1843 *Penny Cycl.* XXV. 491/1 Ulmin, or ulmic acid, may be artificially obtained..by the following process. 1857 Miller *Elem. Chem., Org.* 54 If the solution [of sugar] be kept boiling for some hours,..a certain quantity of formic acid, and of a brown sparingly soluble substance termed *ulmine*, are produced. 1868 Watts *Dict. Chem.* V. 936 Ulmin is also the name of a brown pigment, produced by the action of strong acids or alkalis on various organic bodies.

*β.* 1848 Fownes *Chem.* (ed. 2) 371 *note*, This [substance] is generally called ulmic or humic acid, and its origin ascribed to the reaction of the alkali on the ulmine or humus of the soil. 1851 Gesner *Coal, Petrol.*, etc. (1865) 128 The decay of wood is produced by oxidation, and ulmine is the result.

1901 Dorland *Med. Dict.* (ed. 2).

**-ulose,** a compound adjectival suffix representing L. *-ulōsus*, formed by the addition of *-ōsus* (see -ose) to stems in *-ul-us, -a, -um*, as *angulōsus* from *angulus, fābulōsus* from *fābula, periculōsus* from *periculum*. Such formations are rare in earlier Latin, but a considerable number are employed by post-Augustan writers, as Pliny, Columella, etc. Among the English examples which have their source in classical or post-classical forms are *angulose, calculose, fabulose, fistulose, glandulose, nebulose, pustulose, ramulose, sabulose, vermiculose.* On the analogy of these, various others have been introduced, as *flosculose, globulose, granulose, scrofulose, siliculose, tubulose, tumulose.* These forms are parallel to a certain number of

those in -ULOUS, being as a rule either obsolete variants of these, or introduced later in order to convey the distinction commonly observed between the adjectives -OSE and -OUS.

**Ulotrichan** (*yulρ'trikǎn*). [Cf. next.] A person belonging to the crisp-haired division of mankind.

1838 *Cassell's Encycl. Dict.*

**Ulotrichous** (*yulρ'trikǝs*), *a.* Also **oulo-**. [f. mod.L. *Ulotrichi* (see def.), f. Gr. οὖλος crisp, curly + -τριχος -haired, f. τρίχ-, θρίξ hair. Cf. F. *ulotrique*, Pg. *ulotrico*.] Of or belonging to the *Ulotrichi*, the division of mankind (in Bory de St. Vincent's classification) having crisp or woolly hair.

1857 Mayne *Expos. Lex.* 847/2 Oulotrichous. 1884 *Imp. Dict.* 1909 A. C. Haddon *Races of Man* 3 These three varieties [of hair, *i.e.* straight, wavy, and woolly] are now termed leiotrichous, cymotrichous, and ulotrichous.

**-ulous**, a compound adjectival suffix representing the Latin endings *-ulōsus* and *-ulus*. In the former case there are frequently variants in *-ulose*, which in modern use are as a rule more specific in meaning. To this class belong *angulous*, *calculous*, *fabulous*, *fistulous*, etc. (see -ULOSE); also *crapulous*, *meticulous*, *populous*, *scrupulous*, etc. The number of purely modern formations is not large. To the group which corresponds to Latin forms in *-ulus* belong *bibulous*, *credulous*, *emulous*, *garrulous*, *pendulous*, *sedulous*, *strridulous*, *tremulous*. In a very few instances both forms occur in Latin, as *querulus*, rarely *querulōsus*, querulous; *ridiculus*, rarely *ridiculōsus*, ridiculous.

† **Umbe-,** *prefix* (also 3 ummbe-, 4-5 vmbe-, 5 vnbe-, umbe-, 6 *Sc.* wmbe-, ombe-; 4 vnbi-, 4-5 vmbi-, 5 vmby-, unby-, 6 *Sc.* onby-), partly (in southern ME. texts) representing OE. *ymbe-* (see prec.), but chiefly either an extended form of Umb- (cf. prec.) or a combination of Um- with Be-. Forms with the double prefix (*omembe-* or *ombe-*) are very common in Middle Dutch, not infrequent in older Danish (*ombe-*), and occur occasionally in MLG.; it is possible that their prevalence in MDu. may have contributed to the extensive use of such forms in ME. Originally the *um-* was probably added to verbs which already had the prefix *be-* (as *beclip*, *belap*, etc.), and in most cases the two forms (with *be-* and *umbe-*) coexist with the same signification. In addition to those treated as main words (viz. Umbecast, -clip, -go, -lap, -lay, -set, -think) the following examples occur in ME. texts, chiefly of the 14th and 15th centuries:—umbebraid, to turn round; umbecarve, to circumcise; umbeclap, to embrace, to enclose; umbecleed, to clothe, wrap up; umbeclose, to enclose, enwrap; umbedelve, to dig round; umbedraw, to withdraw; umbefold, to surround, to embrace; umbegang, to go round, to surround; umbegild, to gild about; umbegive, to surround; umbegrip, to grasp; umbegrow, to grow round, overgrow; umbelie, to surround; umbelook, to look about; umbelouk, to include, comprehend; umbepitch, umbereach, to surround; umberow, to row about; umberun, to surround; umbeshadow, to shade about; umbeshear, to circumcise; umbeshine, to shine about; umbesiege, to besiege, environ; umbespread, to spread about; umbestand, to stand round, surround; umbeswey, to encircle; umbethorne, to encompass, surround; umbetigh, to encircle, surround; umbeviron, to environ; umbewalt, to surround; umbeweave, to enwrap; umbewend, to imbed, enclose; umbewet, to wet about.
Of these the following have parallels with the compound prefix (*um-be-*) in the cognate languages:—umbeclead, MDu. *oumembekleden* (pp. *-cleet*); umbeclip, older Da. *ombegribe* (cf. MDu. *ombegrijp* sb.); umbelie, MLG. *ummebeliggen*; umbelook, NFris. *ombilukie*; umbelouk, MDu. *omme-*, *ombeluken* (p.p. *-geloken*); umbelouke, MDu. *ombeschijnen*; umbestand, NFris. *ombistuum*. MDu. *omme-*, *ombestaen* (p.p.); umbetigh, NFris. *ombittin*. Several of these, and many of the others, also correspond in sense to OE. formations with *ymb-* (less commonly *ymbe-*) or to equivalent forms in the other languages, e.g. umbecarve, OE. *ymbcorfan*; umbeelve, (OE. *ymbgedelf* sb.), MDu. and Du. *omdelven*; umbegang, OE. *ymbgangan*, OFris. *ummegunga*, OHG. *umbîgangan*, etc.: cf. the examples given under Um-.

**Un-,** *prefix*[1], expressing negation, representing OE. *un-*, = OFris. *un-*, *on-*, *oen-* (WFris. *ûn-*, *on-*, EFris. *ân-*, NFris. *ûn-*), MDu. (and Du.) *on-*, OS. (MLG., LG.), OHG. (MLG., G.), and Goth. *un-*, ON. *ó-*, *ó-* (Icel. *ó-*, Sw. *o-*, Norw. and Da. *u-*), corresponding to OIr. *in-*, *an-*, L. *in-* (*im-*, *il-*, *ir-*, *i-*), Gr. *ἀν-*, *ἀ-*, Arm. *an-*, Skr. *an-*, *a-*, Indo-Eur. *n̥, an ablaut-variant of *ne* not: see NE *adv.* The prefix has been very extensively employed in English, as in the other Germanic languages, and is now the one which can be used with the greatest freedom in new formations.

2. In OE. the number of recorded forms in *un-* is very large, the prefix being freely applied with a purely negative force to several parts of speech, which may be classified as follows: (*a*) simple adjectives, as *unbeald*, *ceniblide*, *unbrêd*, *uncûbem*, *uncûb*, *undêp*, etc.; derivative adjs., as *unbeadufull*, *unbîldig*, *ungîmig*, *unmæthlic*, *unsælenlic*, *unceallic*, *unrædlic*, etc.; and composite forms, as *unæmcnpnf*, *unféopancol*, *unfæstrêd*, etc.; (*b*) simple adverbs, as *unêaðe*, *unefne*, *unfæcere*, *unfeorr*, etc., and derivative forms, as *unclênlice*, *uncûblice*, *uncâbelice*, *unfæstlice*, etc.; (*c*) past participles of strong and weak verbs, as *unbeden*, *unbegunnen*, *unboren*, *undrifen*, *ungeboden*, *ungecnâwen*, etc., *unbyrged*, *undêled*, *ungedered*, *unclênsod*, *ungeendod*, *ungehîgod*, *unhoht*, etc.; (*d*) present participles, as *unberæmde*, *unbirrende*, *uncwaciende*, *uncwêbende*, *unfêlende*, etc.; (*e*) simple nouns, as *unâr*, *unbeam*, *uncyst*, *unfrîp*, *unlage*, *unþanc*, etc., and derivative forms, as *unclênness*, *unfagerness*, *uncâfscipe*, *unwisdôm*, etc. A prominent feature of the OE. examples is the prevalence of long derivative or compound formations, usually based upon, or corresponding to, Latin formations with *in-*, *im-*, *il-*, as *unaberendlic* intolerable, *unaberendlice* intolerably, *unbegripendlic* incomprehensible, *unbeschawôdlice* inconsiderately, *unforhwæfednes* incontinence. The greater number of such forms were no doubt artificial, and had little or no currency in ordinary language. In a small number of nouns *un-* appears with a pejorative in place of a negative sense, as *unæt* excessive eating, *uncoðu* an evil disease, *uncwæft* an evil art, and similarly *undêd*, *undôm*, *unlagu*, *unwêd*, *unsiþ*, *untîma*, *unweder*. Altogether the number of *un-* words recorded in OE. is about 1250, of which barely an eighth part survived beyond the OE. period.

3. The disappearance of so many of the OE. formations left early ME. with a very limited supply of *un-* words, even when new (or apparently new) examples are added to those inherited from the older language. A fair proportion even of this reduced stock proved unable to survive for more than half a century, and had passed out of use by 1250. A few of these, especially such as obviously had some general currency, are entered in their alphabetical places, but the greater number are given here (together with a few of somewhat later date) as properly belonging to the older period and having no direct influence upon the later development of the prefix. Most of these are composed of purely native elements, but a few show the beginnings of Scandinavian and French influence, as *ungrith*, *unhagerlîg*, *unskathefull*; *unbispused*, *uncowertlich*.

In ME. transcripts of OE. examples a few additional words are found, as *unæfflendlich*, *unaseegliche*, *unfredliche*, *unisewenlich*, *untodele(n)dlich*, *ungearu*.

4. When the words included in the previous section are eliminated, the early M.E. instances of the prefix resolve themselves into the following classes: (*a*) survivals of OE. forms, chiefly adjectives, as *unclene, uncouth, unfele, unfere, unhole, unmilde, unorne, unsely*, and nouns, as *unhele, unlaȝe, unmiȝe, unrede, unriȝt, unsele, unthank, unclenenes, unwisdom*, and a few past participles, as *unbegun, unborn, unbosst, unheled, unwemmed, unwounded*; (*b*) new formations from native elements, as *unbuȝsom, uncamely, unhende, unsiker, untidy* adjs., *unhope, unstrength, unwinne* sbs., *unbeten, undone, unshriven, undemed, unsouȝt* pa. pples.; (*c*) adoptions of Scandinavian forms, or new formations on Scandinavian bases, as *unmeek, unmoit, unsaugt, unslaȝe* adjs.; *unhap, unsaugt, unskill* sbs., *unbigged* pa. pple.; (*d*) new formations on French bases, as *ungracious, unsaoury, untrussed*.

Down to 1300 these additions were comparatively few, and barely compensated for the disuse of obsolescent forms. About that date a southern writer like Robert of Gloucester uses only a small number of *un-* words, and most of these belong to the traditional stock. On the other hand, the northern *Cursor Mundi* has a rich variety of both old and new forms, and indicates clearly the beginning of a fresh period of development. The features which are most notable in this are: (*a*) the increased proportion of past pples. in comparison with adjs. and nouns; (*b*) the reappearance of pres. pples. (as *undeiand, unfeiand, unseand*), which are wanting in earlier ME. texts; (*c*) the increase in the French element, as *uncertain, undevote, undispensed, unfelun, unfruitand, unlele, unleule, unmesure, unpais, unponisi, unpurvuid, unquit, unresun, unresunable, unwised, unwily*. With this revival of the past and pres. pples., and the introduction of *-able*, the way was opened for some of the commonest uses of *un-* in the later language. The tendency thus indicated is clearly marked before the middle of the 14th century; Dan Michel uses pres. pples., as *unconnynde, unspekynde, unwylynde*, while Hampole has *uncomable, uncurable, unsufferable*, and even *unfilfable, unstirrable*. Before 1400 the period of free employment of the prefix had fully begun, as shown by the number of new formations appearing in the works of Chaucer, Wyclif, Trevisa, and others.

b. As in OE., the usual force of *un-* in ME. is purely negative. The pejorative sense however survived in a few words, as *unrede, unsiike, unthew, unweder, unwise, unwrench*, and appears also in *unlede, unluce, unthede, unwiȝ*; in *unbeast* it is employed with a French base.

c. The usual form of the prefix in ME. is *un-*, but *on-* appears in some English texts (as the later version of Layamon, the *Ayenbite*, and the *Promp. Parv.*), and is common in older Scottish, esp. in the 16th century; this form is still current in midland and south-western dialects and in Scotland. In *Sir Ferumbras* (*c* 1380) the form *oun-* is employed, and a pronunciation corresponding to this (*un-*) is still heard in Aberdeenshire. In detached use (see 5 d) the form (*ōn*), sometimes written *ohn*, is also employed in the same locality.

5. Some peculiarities in the use of *un-*, arising in the M.E. period but surviving beyond it, require special notice.

a. It is sometimes redundantly prefixed to adjs. ending in *-lesse*. Early instances are *unrecheleas* reckless, *unroless* restless, *unwitles* insensible (see 3 above), and *ungilles* guiltless (*Sir Tristr.* 21.44). The type, however, chiefly belongs to the later 16th and the 17th cent.; among the instances from that period are *unboundless, unconforttless, undauntless, unefectless, unfathomless, unhelpless, unmatchless, unmercifless, unnumberless, unpeccatless, unremorseless, unrespectless, unshamelless, unshapelessness, untimeless*; as late as 1786 *unquestionless* is found, and *unrestless* exists in modern dialect.

b. From the 14th century onwards there was considerable variation, when the base was of Latin origin, between the Latin *in-*, *im-*, etc., and the

native *un-*. Early examples of forms with *un-*, which either then or a little later have variants with *in-*, *im-*, are *unability*, *uncorrigible*, *uncorrupt*, *uncurable*, *undign*, *undiscreet*, *unmeasurable*, *unmovable*, *innumerable*, *imperfect*, *imperfection*, *importable*, *impossible*. Similar formations continued to multiply during the following centuries, so that a large proportion of the words beginning with *il-*, *im-*, *in-*, *ir-* had corresponding forms in *un-*, as *unadequate*, *unadvertence*, *unarticulate*, *unartificial*, *unattentive*, *unaudible*, *unauspicious*, *uncapable*, etc. The culminating period of the double forms lies in the 17th century; since that time the tendency has been to differentiate, and to discard one or other of the doublets, the forms with *in-*, etc., being very commonly preferred when the whole word has a distinctly Latin character, as *inadequate*, *inadvertence*, *inarticulate*, etc. Even with such forms there is no absolute rule, and doublets are still numerous, as *in-* or *un-advisable*, *in-* or *un-alienable*, etc. (See IN-[2].)

By inadvertence, or simple errors in printing, *un-* or *vn-* sometimes appears in works of the 16–17th cent. for *im-*, *in-*, or *en-*, *em-*, as *vncouraged* encouraged, *vnlarge* enlarge, *vnplayed* employed, *vnpeopledge* empoloning, *vnflam'd* inflamed, *vnpostumed* imposthumed.

**c.** When two or more negative terms occurred in the same clause and were coupled by *and* or *or*, the prefix was sometimes employed only with the first. The following are examples of this practice, which is especially common in Scottish of the 16th century.

*c* 1380 Wyclif *Wks.* (1880) 129 To kepe hym self vnblekkid or defould fro his world. *c* 1450 J. Russell *Bk. Nurture* 944 Lett neuer wollyn cloth.. passe a seuenyght to be vnbroshym & shakyn. *c* 1500 *Kennedy* 1. Orkney* 274 Vnbockkit, vnpenpellit, or sedudgit be ony way. 1569 Knoxes *Hist. Turks* (1621) 83 The insolent soulliers.. nothing dedicated to the seruice of God, left vnpolluted and defaced. *Ibid.* 91 Which companies.. came neere vnto the towne vnseene or discouered. 1707 Mortimer *Husb.* 608 Eggs, vnbroken or crack'd.

**d.** When *un-* is prefixed to present or past participles, these are rarely employed in a true participial function, but become adjectival in character. Examples of the present participle, however, occasionally occur with a following object, or with a prepositional construction; and in Scottish use, from at least the 15th century, *un-* in such cases has acquired the sense of 'without'. More rarely, in the older language, it has the same sense with passive participles. Both constructions are still retained in north-eastern Scottish dialect, with the prefix in the form *on* or *ohn*, frequently written separate from the participle. (The spelling *ohn* is due to, or has led to, a false association with G. *ohne* without.) Examples of these uses are:—

(*a*) 1456 Sir G. Haye *Law Armis* (S.T.S.) 155 All that I may gett apon him, unskaned him *Ibid.* 165 How may than a man do till othir sik dissait, ungrevand God? 1573 *Reg. **6.** During the 15th, 16th, and 17th centuries the use of *un-* steadily increased, a large number of words being thus formed which have permanently established themselves in the language, besides many more which occur only incidentally or rarely. The freedom with which the prefix could be used in new formations appears clearly in the dictionaries of Florio and Cotgrave, who constantly employ it in rendering Italian and French negative terms in *in-*, etc. As the use of *un-* or *in-* (see § b) was still largely a matter of choice, and many of the older formations were still current, the vocabulary of the 17th century exhibits many types in common use which are now rare or obsolete, and in general is extremely rich in words beginning with *un-*. During the 18th century many of the older forms disappeared, and new formations became more limited in number and variety, but the sense of freedom in the use of the prefix when desired is clearly shown by a large number of the examples given by Ash in his dictionary in 1775. These were obviously manufactured for the purpose, and when added to the genuine words which he has included, make up a total of about 5,000 entries. In this way Ash frequently anticipates the actual introduction of new formations. In the 19th century the use of the prefix became still more common, it being freely applied to almost any adjectival or participial form, until its employment has become almost unrestricted, within certain limits indicated below. On this account it is impossible to make a complete enumeration even of forms which have actually been used, still less of those which may be created at any time.

**b.** The form of the prefix indicates that it was originally unstressed (although in OE. poetry it may have stress and carry the alliterative letter), and normally it still bears this relationship to the main part of the word. There is, however, considerable tendency to give stress to it in rare or casual formations, and whenever the negation or contrast which it implies is at all emphatic. In such cases the compound may either have two equal stresses, or the prefix may have the stronger stress; the latter degree of emphasis is usually indicated by underlining or italicizing, and the use of the hyphen; e.g. 'he is distinctly *un*-literary'.

**c.** The following sections illustrate the usual types of current formations, with illustrations drawn from unimportant modern examples, which might be indefinitely increased. All older examples in actual use, and all words important either in themselves or on account of their source, are given in their alphabetical place in the main series. As a large number of these are purely negative and self-explanatory, the place of a definition is supplied by a reference to the section of this article under which the precise type of formation is explained and illustrated.

The entries in Ash (see above) have been regarded as worthy of note only when they anticipate the appearance of a word in actual use. In these cases a reference to Ash is given within parentheses.

A purely artificial formation (suggested by Euphuistic diction) is *un-to-be-imitated* (Scott *Monast.* xx).

**7.** *Un-* is freely prefixed to adjectives of all kinds, except where a Latin form in *in-*, etc., has definitely established itself in common use. Both forms, however, may co-exist, and in some cases a new formation with *un-* has been introduced when that with *in-* has acquired a connotation which it is desirable to avoid. The form with *un-* is then purely negative, while the other may have almost a positive sense, e.g. *un-moral* in contrast with *immoral*. (When the form with *un-* has similarly acquired a positive implication, the simple negative or neutral sense is expressed by the use of Non- or Not-.) There is also considerable restriction in the use of *un-* with short simple adjectives of native origin, the negative of these being naturally supplied by another simple word of an opposite signification. There is thus little or no tendency now to employ such forms as *unbroad*, *undeep*, *unwide*, *unbold*, *unglad*, *ungood*, *unstrong*, *unwhole*, *unfew*, etc., which freely occur in the older language. On the other hand, derivative forms in *-al*, *-ant*, *-ar*, *-ary*, *-ent*, *-ful*, *-ic*, *-ical*, *-ite*, *-ish*, *-ive*, *-ly*, *-ory*, *-ous*, *-y*, etc., are too numerous to be completely recorded. The general character of the less usual or permanent of these and other adjectival forms is illustrated by the following examples, which are restricted to such as are recorded before 1890, and could be indefinitely increased by the addition of later or less noteworthy material.

In dictionaries of various dates many formations are given of which no real instance has been found. Levins (1570) has *unhateful*, *unprecious*. Florio (1598 and 1611) renders equivalent Italian words in *in-* by such forms as *unavail'ful*, *unbrittle*, *unconstinuall*, *uncoy*, *unempty*, *unfrail*, *unlice*, *unoffensible*, *unopen*, *unpitiefull*, *unsolitarie*, *unvalorous*. Ash (1775) gives *unalphabetical*, *unattendant*, *uncohesive*, *uncompatible*, *uncomprehensible*, *uncompulsive*, etc. (about 80 in all). Later dictionaries (Webster, Worcester, etc.), with or without indication of source, have the entries *unabundant*, *unbiographical*, *uncogent*, *uncollectible*, *undeceptive*, *undeliberative*, etc.

b. The use of *un-* with adjs. in *-able*, beginning in the 14th cent. (see 4 above), soon became common, and rose to a large number of formations in the 16th and subsequent centuries. In the modern period the examples become too numerous for illustration; in addition to those entered as main words, those given below (all earlier than 1890) will serve as specimens of the freedom with which new formations are created. These are sometimes due to an antithesis of the form 'not only . . but', as 'not only unpainted but unpaintable'. The unusual types *uncome-at-able* (1694–), *unget-at-able* (1862–) are later in date than the corresponding positive terms; but illustrations of similar forms see (*b*).

Cotgrave (1611) has *unabonardable, unaccompanable, unaccostable, uncorruptable, uncitiplayable, unenitable, unexceedable, unexpressable, unexterminable*, etc. Florio (1611) has *unacceptable, unacknowledgable, uncomprehensible, unsuccourable, untraffickable, unwouldable*, and Hexham (1648) *unbesteatable, unbindable, unlabourable*. Ash (1775) introduces about twenty-five new forms, as *unadmittable, unapprobable, unarrestable, unavaishable, unavertenable*. An extreme instance is *un-in-one-breath-utterable* (B. Jonson *Ev. Man in Hum.* I. v.).

c. The use of *un-* with adjectives in *-like* is found from at least the close of the 16th cent., when *ungentlemanlike* appears. Others occur in the following century, as *unbodylike, ungodlike, unswarlike*. The free use of such forms, however, is characteristic of the 19th cent., and especially of the latter part of it. The following are examples of casual formations earlier than 1890.

1885 *Pall Mall G.* 1 Nov. 13 So contemptible, detestable, and "un-actor-like a proceeding. 1674 N. 8. The prefixing of *un-* to past participles, common in OE. and revived in ME., was subsequently extended until it became the commonest of all uses of the prefix. The following varieties may be distinguished in the usual formations:

a. Simple past pples. in *-ed*. These form an inexhaustible class, largely represented among the main words, and including many more similar to those in the following list.

A few causal forms are employed by Florio (1611), as *uncomforted*, *unnotted*, and various others by Hexham (1648), as *unbalsamed*, *unbeshibbled*, *unblest*, *uncalumniated*, *uncharkered*, etc. Ash (1775) catches this type of formation to great lengths, and enters about 800 words which are either not recorded, or are of rare occurrence, in actual use, as *unabetted*, *unaccited*, *unacquitted*, *unadjudged*, *unalleged*, *unamplified*, *unapprized*, etc.

As subdivisions of this type, forms in *-ated* and *-ised* may be specially noted on account of their frequency. These are also largely represented in Ash's dictionary, which contains about 150 unused forms in *-ated*, as *unaccumulated*, *uncamphorated*, *uncircumstantiated*, etc., and a score or so in *-ised*, as *unepostrophized*, *unaromatized*, *uncantonized*, etc.

On the double meaning of forms like *undressed*, *unhonored*, *unscathed*, etc., see Ux.[2] 8.

b. Past pples. with other endings, from strong or weak verbs. These form a much smaller class, but include a considerable number in common use, as *unbegun*, *unblown*, *unborn*, *unbought*, etc. A few are found with *-ate* for *-ated*, as *unevaporate*, *-exaggerate*, but these and others not permanently established in the language are of rare occurrence.

Examples in Ash are *unbeset*, *uncast*, *uninterwoven*, *unshaken*, *unshown*, *unsling*, etc.

c. Participial formations with *un-* frequently have a suffixed adverb or preposition (usually with a hyphen when the formation is used attributively). An early example of this is *unborne-away* (Caxton, 1483); others make their appearance in the 16th and 17th centuries, as *uncalled-for*, *uncared-for*, *unheard-of*, *unlooked-for*, *unthought-of*, etc. A number of these have become permanent and are in general use; the following are examples of more casual formations.

1782 H. Spencer in *Centurjh. Mag.* 613 Exceptional communities unaggressive and from special causes *unaggressed upon. 1898 Froude *Hist. Eng.* IV. 496 Unvouched for, *unalluded to by any contemporary authority as yet discovered. 1872 G. R. Chapman *Lect. Pilgr. Fr.* xiv. 345 What we know of the..state of *untabernacled souls is but little. 1890 'R. Boldrewood' *Col. Reformer* (1891) 244 The serene *untempested heavens of the isles of the blest. 1860 C. W. Holmes *Elist. Ch.* 1872 There states of mind..which remain not only unworded, but *unthoughted. 1867 H. Convegare in *Fortn. Oisin* (1908) 259 His vast foot that lay Half in the *unvesselled sea. 1866 Crichton *Rambles Oreades* 34 Over country *unrailway-ed* and *unville-ed*.

D. Instances in which the noun is preceded by a qualifying word are not numerous, and such formations are usually individual or casual.

[1650 Trapp *Comm. Lev.* xxi. 18 Lest his Ministerie bee sleighted for..unheavenlie mindedness.] 1870 *Routledge's Ev. Boy's Ann.* May, Suppl. 3/1 Plain white unwatermarked paper. 1872 Ruskin *Fors Clav.* xix. 6 My notion of..charity is, by no means..the giving to unable-bodied paupers.

10. The use of *un-* with present participles, revived about 1300 (see 4 above), subsequently became common, and has given rise to a large number of permanent words, such as *unbecoming*, *unbending*, *unchanging*, *undoubting*, etc. (On the participial use of such forms see 5 d.) Examples of casual formations are given below.

Others occurring in Ash's dictionary are *unbegulling*, *undiasing*, *undithing*, *unintalling*, *unenticing*, *unflowing*, etc.

1883 R. Bridges *Prometh.* 79 Hope..to cheer with visions fair Their *unamending pains. 1844 Warblaw *Prom. Speeds.* (1860) 141 Dictionaries of this essay *unamoring description. 1873 Ruskin *Fors Clav.* xxx. 2 He shewed his wisdom in pleasant and *unappalling ways. 1845 R. W. Hamilton *Pop. Lecture.* III. (ed. 2) 40 Agriculture,..in the ordinary processes of husbandry, has been found *unarousing. 1876 Mrs. Whitney *Sights & Ins.* II. xxxvii. 673 There had been two wonderful tides, that which carried them forth, all uncertain, *unbelonging*, separate. 1870 G. T. Dennis in Bonar *Life* II. (1882) 70 Our study will be comparatively useless and *unbeneffiting. 1885 *Pall Mall G.* 6 Feb. 6/1 A safe and *unblundering guide through the mazes. 1862 Furnivall *Handling Syme* Pref. p. ix, Ready to turn to account, though in an *unboring way, every opportunity. 1872 C. E. Norton *Lett.* (1913) I. viii. 472 Carlyle seemed a little weary, perhaps weakened by the mild *unbracing weather. 1837 Whittock *Bk. Trades* (1842) 358 None of these ends can be accomplished..unless this be done in a near *unbungling' manner. 1866

These are anticipated in OE. by such rare formations as *ungefepered*, *ungewintred*, *unwuhled*, but otherwise belong to the 16th and subsequent centuries. The usual sense is 'not provided or furnished with', but sometimes 'not affected by', 'not treated with', etc.; in the latter case the use is not clearly distinguishable from the purely participial.

Ash gives such instances as *unapproved*, *unbroached*, *unbuskined*, *uncheroished*, *uncilented*, *uncoated*, etc.

**11.** In OE. adverbial formations in *-lice* formed a large portion of the words in *un-*. Very few of these survived in ME., but additions were gradually made which maintained the existence of the type (ending in *-liche* in southern dialects and *-ly* in the northern). Subsequently the use of *un-* with *-ly* again became common, independent of the form of the central element, which may be an adjective, present or past pple., etc. There are however two ways in which such formations may arise. Either the suffix *-ly* is added to a form already beginning with *un-*, or *un-* is prefixed to an adverb already formed with *-ly*. In most cases the difference in sense is slight or immaterial, but at times the distinction becomes important. If *unprofessionally* is formed from *unprofessional* it means 'at variance with, contrary to, professional rules or etiquette', if from *professionally* it means 'not in a professional manner or capacity'.

The following are miscellaneous examples of recent formations.

A few others occur in early dictionaries, as *unaccessively, unbewailably, unfaitely, unrecoverably.*

b. *Un-* is seldom prefixed to simple adverbs. Even in OE. such formations are rare, though a few do occur, as *unéalle, unefne, unfegere, unfeorr, unseldan, unsófte.* ME. retained most of these, but the number has at no time been greatly added to, and the latter tendency is to discard such forms altogether.

**12.** The OE. use of *un-* with substantives (see 2 a above) survived very fully in ME., not only by the retention of old forms but by the introduction of many new, which continue to multiply in the later periods of the language. From the beginning the nouns have been almost entirely restricted to those of an abstract nature, so that forms with suffixes are numerous. In OE. and ME. the commonest of these is *-ness* (occasionally *-dom* and *-ship*); subsequently *-ation, -ity, and -ment* are frequent, as in the following selection of miscellaneous examples.

Florio (1611) has a certain number of casual formations, as *unacknowledgement, unarmness, unbridlenessness, unchildishingness, unelegance, unfrailness, etc.* Ash gives *unadequateness, uncommensurability, -ableness, unfrugalness, unliableness, unorganizedness*, and various others.

b. The prefixing of *un-* to nouns used attributively is rare and usually not intended seriously.

Other examples are *uncurrency-style* (1852), *undining-room* (1845), *unhouschold-name* (1894), *unsociety-people* (1898).

**13.** In OE. there are a few instances of *un-* with verbal substantives in *-ung*, as *unbletsung, -lovsung, unmeltung*, etc. None of these survive in ME., and new forms in *-ing* are rare; *unlinning* occurs *c*1250, *uncunning c*1300, *unknowing, unpunishing c*1340. In the later language the usage also remains rare, and in nearly all verbal sbs. the prefix *un-* is UN-2; a few exceptions are recorded here.

(Cassell's), Why was this unowning of the plays necessary?

**14.** In OE. the use of *un-* with verbs is limited to formations from negative adjectives, as *unclénsian, unrótsian, untrennian* from *unclénc, unrót, untrun.* (More commonly *ge-* is prefixed, as in *geunclénsian, geunrótian*, etc.) This type barely survived in ME., but *un-* began to be sparingly prefixed to ordinary verbs, as *untrowen* (*c*1200) to disbelieve, *untrusten* (*a*1225) to distrust, *unbetide* not to happen, *unbe* not to be, and similar formations are fairly common in the 16-17th c., as *unbecome, unbefit, unbelieve, unbeseem,*

*uncomprehend, unconcern*, etc. Many of these are obviously suggested by the participial adjectives (*unbecoming*, etc.), which are quite regular in formation (see 10 above). The type is now rare, but occasional examples occur.

15. By confusion of thought, *un-* is sometimes used redundantly, especially in the 16th and 17th centuries, where a positive term is really intended. For examples see *undated* (1637), *undifference* (1654), *undifferency* (1583).

**UN-**, *prefix* [2], expressing reversal or deprivation, representing OE. *un-*, *on-* = OFris. *und-*, *unt-*, *un-*, *ont-*, *on-*, MDu. and Du. *ont-*, OS. *unt-*, OHG. *ant-*, *int-* (MHG. and G. *ent-*), Goth. *ana-* originally identical with AND- *prefix*.

2. From OE. more than a score of reversive verbs formed with *un-* (or its variant *on-*) are recorded, as *unbindan, unceptian, undón, unfeadan, ungeardan, unlæcan, unlocian*, etc. Some of these were in common use; others occur only or in single instances. About half of the number (including all those mentioned above) survived in ME., and various new formations appear in texts from the first half of the 13th century, as *unbenden, undytten, unfast(n)en, unhaspen, unhillen, unlimen, unmensken, unsteken*; even at that date the prefix is used with verbs which are not of native origin. Similar formations from later ME. are *unbuckle, uncatch, unclench, uncover, unfetter, unkevel, unsew, unshut, unwrap, unyoke*. The following are examples of obsolete ME. forms:—unhadien [OE. *unhddian*], to deprive of ecclesiastical orders; unmensken [f. MENSK *v.*], to dishonour; unro'ne [f. RONE *v.*], to make desolate; hence *unro'ningness*; unteo'n [f. *teon* TEN *v.*[1] 6 b], to fall apart.

b. In the 16th century new formations with *un-* become very numerous and varied, and in the 17th the prefix is used with much greater freedom than is now possible. The lexicographers Florio and Cotgrave constantly employ it in rendering Italian words in *dis-* and *s-* and French words in *in-, des-*. By this time the prefix had developed several variations of sense which are still current, and are illustrated by modern examples in the following sections.

3. In OE. most of the forms with *un-* have for their second part a simple verb, either strong (as *un'indan, unfeadan. unlócan*, etc.) or weak (as *uncnyttan, undón, ungierwan, ungyrdan*, etc.). In either case the prefix denotes a simple reversal of the action of the verb. Many of the new formations in ME. are of the same type, as *unbend, unclench, uncover, unfasten, unhasp, unhide, unshut*, etc., and additions to this class continue to be freely made at all subsequent periods. In addition to the numerous examples entered as main words, many others have been casually employed, similar to those here illustrated.

Florio and Cotgrave make extensive use of this type, e. g. *unastony, unbraid, uncancel, unclamse, unclutter, unconjeate, uncurd, unfeiter, unflow*, etc. Ash gives *unbaste, unmoble, unsoiler, unsort*, etc.

b. Substantives are similarly employed without ending.

Florio has a number of examples, as *unbride, uncitizen, uncoward, undoctor, undwarf*, etc. Casual formations are frequently employed by Fuller, as *uncarnival, uncheaplain, uncity, unmartyr*, etc.

**7.** With rare exceptions, the OE. verbs in *un-* are transitive, and this has always remained the prevailing use. In ME., however, intransitive uses of some common words are found, as *unbend, unclose, unlouk*, and in casual formations as *unbody*. In the later language the usage increases to some extent (as in *unfold*, etc.), but is chiefly confined to words having some currency.

Florio employs *unday, unlebt, undroep, unsicken, unsuell*. The following are rare modern instances.

1816 Colman *Br. Grins, Champernoune* ii, His courtiers swore..They'd broil a pope to keep a place, So all unpapalized apace. 1832 Trelawny *Adv. Younger Son* II. 123 Look at him, he is unturbaning! 1862 Helps *Org. Daily Life* 108 The organization grinds on,..and it is very difficult to make the thing ungrind.

**8.** Verbal substantives, participial adjectives, and agent-nouns are naturally formed from verbs in *un-* as from simple verbs. These forms begin to appear in the 14th century, and become common in the later language.

Many of the past pples. and ppl. adjs., as *unbent, unbound, undressed, unfastened*, etc., coincide with formations in which the prefix is Un-1, and the distinction in meaning is not always sufficiently clear to admit of an absolute separation between the forms. Either prefix is normally unstressed in all participial formations used predicatively, but commonly receives the main stress when employed attributively, as *an unbent bow, an unbound book*.

**9.** The redundant use of *un-* is rare, but occurs in OE. *unlesean*, and ME. *unloose*, which has succeeded in maintaining itself. Later instances are *unhare, unsolve, unstrip* (16–17th cent.), and the modern dialect forms *unempt(y)*, *unrid, unthaw* (also locally *uneave*).

For occasional misuses of *un-* see *unloaden, unranked*.
